

## iBoss Block Page

Below is a sample of what an iBoss block page looks like. iBoss blocks websites by what group your username is in. There is a student group, a teacher group, an administrator group, and so on.

There may be times when iBoss is unsure of your username and/or group. If you get to an iBoss block page and believe you should be able to access the site you are blocked from please click the “log in as different user” button. The red arrow below shows its location.

Once you click this the following screen will pop up:

In this window type your network username and password. This is the information you use to log onto Wakulla County School computers, email, and Focus. Once authenticated, you will be able to access websites in your correct group.
